

DISSEMINATION

Biography

Dissemination is a Melodic Power/Symphonic Metal band that formed in August 2022 in Vienna, Austria, with international roots from all across the world, who share a love for heavy and melodic music. The band draws inspiration from real-life stories and doesn't shy away from telling the unfiltered truth in their lyrics.

Influenced by bands like Children of Bodom, Dream Theater, Nightwish, and Avenged Sevenfold, the band blends melodic and instrumental elements into their heavy and aggressive sound. Their complex arrangements and powerful riffs showcase their technical proficiency and musicianship.

The band dropped their well-received single "Wake Up Dead," an emotional track with tight riffs which sets the tone for what's next. Something big is coming before their live show on October 4, 2025, at Szene Vienna.
